## Circular Cambridge

Circular Cambridge is a season of events organised by Cambridge Carbon Footprint (a local charity concerned about climate change and supported by the council) that celebrate progressive ways to design, manufacture, access, repair and reuse the things that we want and need in our lives.

To try to move away from the way in which we buy things, use them, then throw them away, Circular Cambridge has invited organisations and individuals to showcase their innovations or come

up with their own events aimed at minimising waste, and promoting sharing, swapping and reuse.
